

# Economics for Health Cigarette Tax Scorecard

## Jordan Fact Sheet

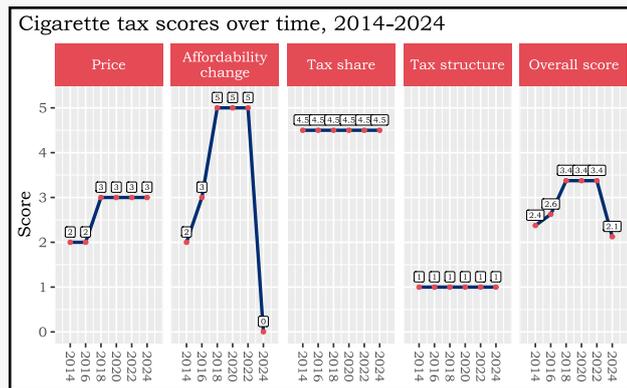

### Cigarette tax policies in 2024

The Scorecard assessed four key tax components using a 5-point scale, namely cigarette price, change in cigarette affordability, tax share and tax structure, with the overall score reflecting an average of Jordan’s component scores. The score reflects the current strengths and opportunities in Jordan to further increase tax revenue and improve health.

### Cigarette tax policies over time

Jordan’s overall score increased between 2014 and 2018, but decreased in 2024 due to a significant decline in the affordability change score.

### Comparing Jordan to other countries

Jordan scores better than the average scores of countries in its region and income group, and higher than the global average, yet there is ample room for improvement relative to top performing countries.
